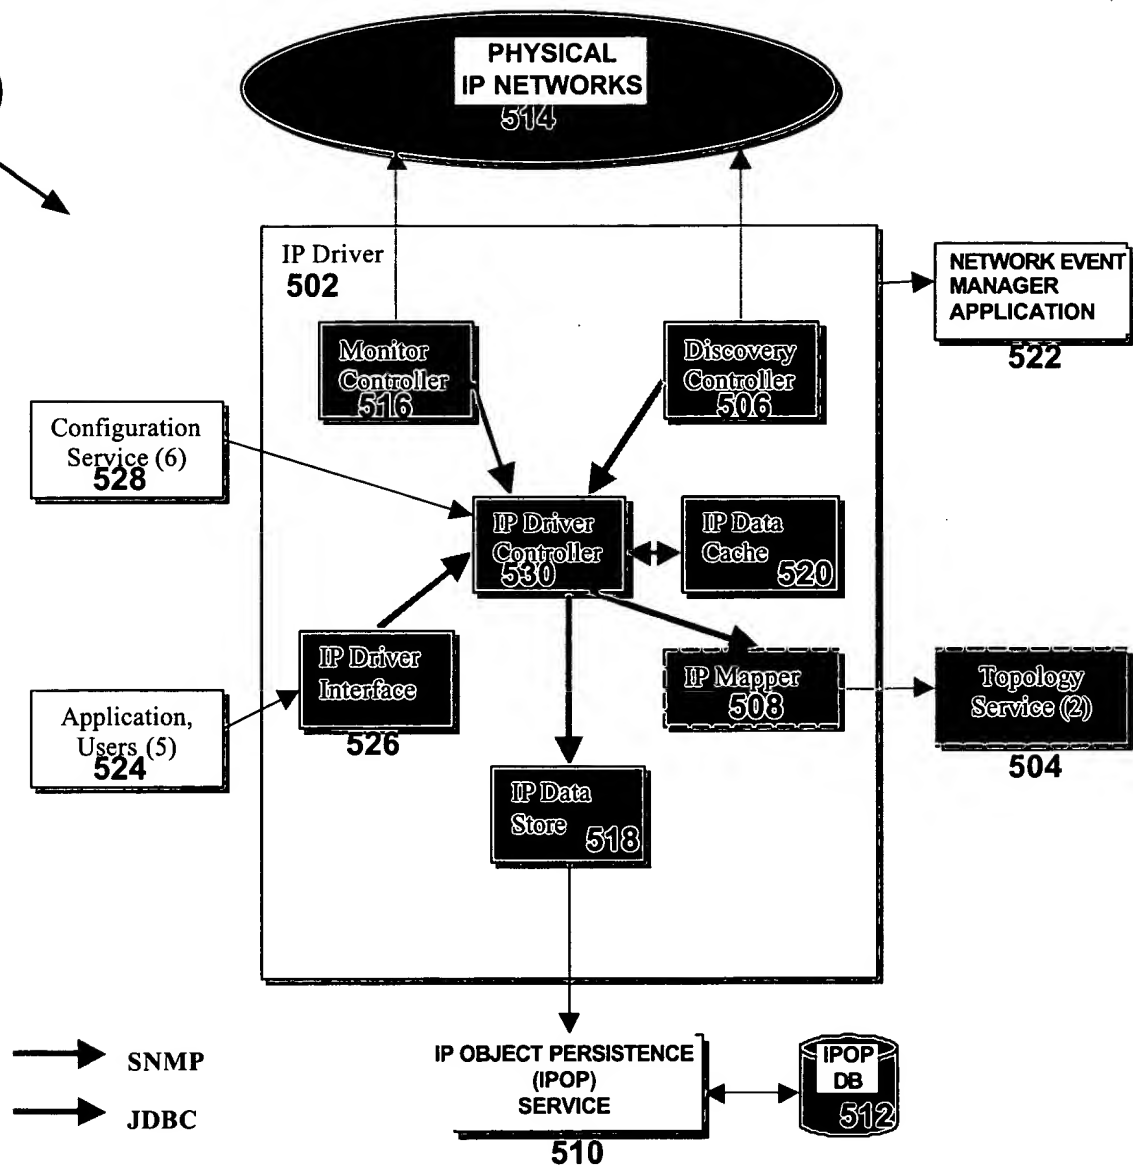

Figure 5

```
graph TD; A([BEGIN]) --> B[BLOCK APP FROM RESOURCES  
602]; B --> C[IDENTIFY AND CONFIGURE  
LEASEABLE RESOURCES  
604]; C --> D[CONFIGURE JVM FOR LEASING CERTAIN  
RESOURCES  
606]; D --> E[CONFIGURE APPLICATIONS AND USERS  
FOR LEASING RESOURCES  
608]; E --> F[INITIALIZE FOR PROCESSING  
ACTION OBJECTS  
610]; F --> G([END])
```

The flowchart illustrates a sequential process for leasing resources. It begins with a terminal symbol labeled "BEGIN". The process then proceeds through six numbered steps, each in a rectangular box: "BLOCK APP FROM RESOURCES 602", "IDENTIFY AND CONFIGURE LEASEABLE RESOURCES 604", "CONFIGURE JVM FOR LEASING CERTAIN RESOURCES 606", "CONFIGURE APPLICATIONS AND USERS FOR LEASING RESOURCES 608", and "INITIALIZE FOR PROCESSING ACTION OBJECTS 610". The process concludes with a terminal symbol labeled "END".

```
graph TD; 600([BEGIN]) --> 652[DISCOVER PHYSICAL NETWORK TOPOLOGY<br/>652]; 652 --> 654[ASSIGN OBJECT ID'S TO EACH ENDPOINT<br/>IN IPOP DB<br/>654]; 654 --> 656[CREATE ACTION OBJECT ROUTES IN IPOP USING<br/>GATEWAY CONFIGURATION SERVICES<br/>656]; 656 --> 658[STORE VALID LEASE TIMES FOR ALL ENDPOINTS<br/>BY USER AND/OR TARGET RESOURCE<br/>658]; 658 --> 602([END]);
```

Flowchart 600 illustrates the process of creating action object routes in IPOP using gateway configuration services. The process begins with a terminal node labeled "BEGIN". An arrow points down to a process node labeled "DISCOVER PHYSICAL NETWORK TOPOLOGY" with the reference numeral "652" below it. Another arrow points down to a process node labeled "ASSIGN OBJECT ID'S TO EACH ENDPOINT IN IPOP DB" with the reference numeral "654" below it. A third arrow points down to a process node labeled "CREATE ACTION OBJECT ROUTES IN IPOP USING GATEWAY CONFIGURATION SERVICES" with the reference numeral "656" below it. A fourth arrow points down to a process node labeled "STORE VALID LEASE TIMES FOR ALL ENDPOINTS BY USER AND/OR TARGET RESOURCE" with the reference numeral "658" below it. Finally, an arrow points down to a terminal node labeled "END".
